

SafetyNet

Our SafetyNet was designed to help companies of all sizes obtain the technical support they need…when they need it. We provide 24X7 network monitoring, security services and onsite maintenance at an affordable rate. In case of emergencies, network outages and other mission-critical issues that may arise, our services provide prompt and efficient solutions. The InSolutions SafetyNet allows your company to concentrate money, attention and time on strengthening your core business while still enjoying the benefits of high-quality IT support.

The top reasons for a business to use our SafetyNet are:

- Preventative network maintenance to ensure optimal performance
- Reduced and controlled operating costs
 - Priority customer service
 - 24X7 network support
- Access to a team of certified engineers
 - Exclusive pricing
 - Web-based ticketing system through our exclusive customer portal
 - 20% discount on all labor with extended contract
 - Firewall monitoring and management
