

Backup Solutions

What would happen if your data was suddenly lost as a result of a hard drive crash, accidental data deletion or theft? Of the companies that lose their data in a disaster, 90% are out of business within two years, according to the University of Texas Center for Research on Information Systems. Without a robust backup strategy, you could be one of these failures. However, with a strong backup strategy, you'll have nothing to worry about. InSolutions, Inc. is committed to offering the best and most cost effective backup data management solutions.

A robust backup solution is:

Simple. Data selection is easy. Office and remote users can easily access and restore information.

Secure. Highly secure private key encryption ensures your data stays yours. Your data will be stored redundantly in state-of-the-art data centers.

Continuous. Automatic detection and backup of new and changed files every 2 hours.

Convenient. Users have the option of restoring from multiple file versions up to 30 days in the past.
