

Core Competencies

At InSolutions, we proudly design and implement solid, secure technical solutions while providing excellent customer service. We employ a team of certified professionals, many of which come from Fortune 500 organizations. We differentiate ourselves by delivering big-company breadth and depth in our level of service at a price that is affordable for small and mid-sized enterprises.

Our clients depend on our capabilities to deliver what we promise! Our core services utilize a broad approach in helping each one of our clients reach a level of assurance. Unlike other consulting firms, our mission is to provide services that prove to be the most effective to your organization, while training your staff to sustain your company's security posture.

Our competencies include:

- Outsourced information technology management
- Outsourced helpdesk and desktop support
- Consulting, using only the strongest resources available
- Network Monitoring to ensure uptime and support your business
- Project work, from project management through to the implementation phase, into go-live support and beyond
- Mobile Tactical Product Teams- we rapidly deploy your product to your customers using our engineering staff
- Web work, either one-time or ongoing
- Disaster recover/ business continuity planning
- Customized technical training and technical documentation
